Part B for March 32

SUBJECT.

Extending the period of deputation of Mr. B. Rama Rao by 6 months

---

Lr 55-6 dt 28.3.32
from Dir of Geol: Compt to Govt this Fin Dept

Sanction the recommendations of the Dir of Geology re

Serial No.

13 From the Dy Com'r Geol
No 7013-35- Dated 28/11/32

Kindly note that the date of the opening of the technical session of the International Geological Congress, Washington, has been postponed from June 1933 to 22nd July 1933 and that this will mean the detention of Mr. B. Rama Rao in London for about 7 weeks longer and requesting sanction for an additional sum of £ 357- at the rate of £20- p.m. for the Officer's stay in London for 7 weeks.

Submd.

Q.
vide 16-32-6.

On Govt. order dated 10/10/32 an allowance of £ 20 p.m. has been sanctioned to Mr. Rama Rao for his stay in London for 6 months (vide flag D). As the opening of the Congress has been postponed from June 1933 to 22nd. July 1933, Mr. Rama Rao has to stay in London for about 7 weeks more. The Com'r says that a sum of £ 357- at the rate of £ 20 p.m. for 7 weeks is required as the Deputy Com'r's post is not filled up this year, this amount may, perhaps, be met from the savings under Salary of the Officer in the current year's budget.

1868

The file relating to the appropriate settlement in connection with Mr Rama Rao's deputation has been submd to the Govt on 7/10/32. This may perhaps be submd to the Govt & in continuation

I do not think any additional Exp: will be incurred in the current year on this account - What will happen is that he will spend some time more in London in the current year instead of spending it in America for which provision at 15- dollars per day for 30 days (Rs 687) has been already made. This will be more than enough to cover the addl. 35 £ now mentioned - A revised calculation for the Expenses payable next year and the provision to be made therefor might be got The present order therefore requires revision

File No. 16 of 1932

General and Revenue Secretariat

15-

From the Govt of Agriculture Geology
No 7013-40 dated 25/9/33.

I do copies of two letters from Mr. B. Rama Rao, Asst-Geologist, and recommend the extension of Mr. Rama Rao's deputation period by two months i.e., September and October 1933 to enable him to qualify for the D.I.C. of London

Subd

The Govt says that an extn 3½ months will be necessary for Mr. Rama Rao to stay in London to qualify himself for the D.I.C. (of which about 6 weeks would be before the American geological Congress and 2 months after his return from America) and this will involve an additional cost of £ 71/-. (£ 35/- to be provided for in the current year's deputation charges and the balance of £ 36/- during next year, 1934-35)

Head reference is invited to this Govt letter dated 25/9/33 in which it was pointed out that the additional amount of £ 35/- required for Mr. Rama Rao's extn stay of about 7 weeks in London before the congress opening during the current year may be met from the amount provided for his stay in America during this year.

The Govt has been requested to send a revised calculation for the expenses payable next year

C

Serial No.

The balance of £ 36/- required for his stay in London during Sept and October 1933, has to be provided for in the next year's deputation charges in addition to a sum of Rs 23452 already sanctioned in Govt order dated 10/10/32 (Flag D). The Statement showing expenses during 1933-34 (Flag D) has to be revised on account of the extension of the deputation period by 2 months if it is sanctioned and the revision of the cost of deputation during 1932-33. As Mr. Rama Rao will continue his stay in London till the end of the current official year, the amount of £ 450/- provided for his stay in America during the month of June 1933 will be utilised for expenses during his extended stay in London (vide this Govt letter dated 25/7/33 Flag C) So £ 450/- has to be provided for in the next year's deputation charges. It is seen from the Estimate of expenses during 1933-34 that the Steamer fare has been included. As return steamer ticket was purchased in the current year, as per Govt order dated 10/10/32, the amount provided for the steamer fare during 1933-34 (vide Flag D) may perhaps be more than enough to meet the additional amount of £ 36/- asked for. We can may, perhaps, be requested to send for orders of Govt a revised detailed Estimate of the expenses during 1933-34 in the light of the revision of the programme

The estimate of expenses provides for single 2nd class fares each way but the Controller Searchlights returns P & O 2nd class 'B' Steamer fare from Bombay to Marseilles. The amount of Rs 642 does not however cover the entire charges of the return fare. This portion of the estimate also requires revision in the light of the C.C.

NOTE—Contn. Sheet.

of his study ~~was~~ ~~not~~ ~~but~~ ~~they~~ has to be completed in regard to the granting an additional sum of £ 36/- required during next year."

Submitted for orders with reference

Rd
13/33

The progress of work of Mr Ramadas thus far is reported to be satisfactory.

As regards his qualifying for the diploma of the Imperial College of London (D.I.C). Mr Ramadas seems to have acted rather in a hurry in having registered his name for the ~~D~~ D.I.C. ~~as already done~~ as stated in para 7 of the Dean's letter (Rd). This means an extra cost of £70/- as ~~stated~~ stated by the Dir

In this connection kind reference is invited to the II Member's minute at para 39 of the notes in Depn Collect. Geo file No 16-28/Sts 1-10 post up wherein he ~~made~~ remarks " It is not necessary that he shd attempt to get higher degrees in England " and the Finl Member's minute at para 41 wherein he states " All possible economies in passage & other allowances may be made". The Dir's recommn is

Mr. Rama Rao, it had been understood, will not graduate for any higher diploma He has entered his name for this. But how may the cost of his own product Govt. Govt cannot undertake to pay this amount

First Member.

3.3.33.

4/3

The holding of the International Geological Congress which Mr. Rama Rao has been asked to attend, has been postponed and he has, therefore, to stop in London for six weeks more, than was originally anticipated, before going to America. After attending the Congress, he has to go to Canada to study Asbestos Deposits and their mining there. The cheapest route from Canada to India is via Marseilles and at the suggestion of the Comptroller, Mr. Rama Rao has already taken a return passage for his journey back ~~to~~ from Marseilles to India. In these circumstances, he has necessarily to go back to Europe after finishing his work in America. If he stops for only two months more in London, he can take the Diploma of the Imperial College of London and that will be evidence of some serious

NOTE—Contn. Sheet.

serious scientific work done by him there. He will carry on research work on a selected problem on Petrology and submit a thesis on it and he will thus add to his knowledge of the science of Geology. This extra stay of two months more in London costs only £ 40/- more and I think in these circumstances the recommendation of the Director of Geology may be sanctioned.

Secretary to the Government of
His Highness the Maharaja of Mysore,
Development Department, Bangalore.

SIR,

Adverting to Government order No.D.1538-9/Geol.16-32-6 dated 10th October 1932 sanctioning the deputation of Mr. B. Rama Rao, Assistant Geologist, to England and America, I have the honour to state that a communication has since been received from the Secretary, International Geological Congress, Washington, D.C., U.S.A., (copy herewith) to the effect that the date of the opening of the technical session of the Congress has been postponed from June 1933 to 22nd July 1933. This will mean the detention of Mr. Rama Rao in London for about 7 weeks longer. It, therefore, necessitates an increase in the provision made for the officer's stay in London by £35/- at the rate of £20/- per mensem. I therefore request that this additional amount may kindly be provided in the current year's deputation charges of Mr. B.Rama Rao.

I beg to state that there is no source in the departmental budget from which the above expenditure can be met.

Early orders of Government are solicited.

I have the honour to be,
Sir,
Your most obedient servant,

A. M. Sen

INTERNATIONAL GEOLOGICAL CONGRESS

XVIth. Session, U. S. A.;

1933.

U . S . Geological Survey, Washington, D.C.

The Committee on Organization, International Geological Congress, 16th Session, has the honour to extend to the Mysore Geological Department a most cordial invitation to be represented by delegates at the 16th session of the International Geological Congress, which will assemble at Washington, D.C., July 22, 1933 and continue until July 29. Excursions to portions of the United States of particular geologic interest will precede and follow the technical sessions at Washington.

In accordance with paragraph VIII of the Statutes adopted by the 13th Sessions of the International Geological Congress, no professional qualification is required for registration at the technical sessions, but on the excursions preference will be given to geologists, geographers, mining engineers, and those engaged in the study or application of some branch of geology.

Further details are given in the accompanying circular. Please note that in response to requests from intending foreign members the date of the opening technical session has been changed from June, 1933, as announced in the circular, to July 22, 1933. An additional circular giving more complete data will be issued at a later date.

It is respectfully requested that if and when delegates have been designated, their names be forwarded to the General Secretary of the Committee on Organization. This will allow the Committee to communicate with these delegates directly concerning all details of the Congress.

(Sd) Waldemar Lindgren,

Chairman.

FROM

A. M. SEN, Esq., M.Sc., F.G.S., etc.
Offg. *Director of Geology in Mysore,*
Bangalore.

DEVELOPMENT SECRET
27 FEB. 1933

To

S.Abdul Wajid, Esq., B.A.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
Development Department, Bangalore.

SIR,

I have the honour to forward herewith copies of two letters lately received from Mr. B.Rama Rao, Assistant Geologist now on deputation in London, for the information and favourable consideration of Government. The first one dated London 2nd February 1933, is a copy of the quarterly progress report of the work done by him submitted in accordance with the instructions contained in the Government Order No.D.1538/8/Geol.16-32-6 dated 10th October 1932, sanctioning his deputation to England and America.

2. The report shows the work done by him in the modern petrographic methods which would be useful in studying the Mysore rocks, especially in determining their various mineral contents. He has also attended lectures on advanced petrology and Geophysical methods of prospecting, and has visited the kaol: (China-clay) deposits of Cornwall, also the tin and copper lodes in that District. This progress of work appears to be quite satisfactory.

3. In the second letter dated London 9th February 1933, Mr. Rama Rao states that the sessions of the International Geological Congress would be held at Washington D.C. (U.S.A) from 22nd July to 29th July 1933; and to participate in the selected tour prior to the Congress he must reach Washington on or before 9th July 1933. This will necessitate his stopping in

in London till the end of June or a little later, which means an extra period of about six weeks longer than that noted in the Government order sanctioning the deputation. I beg to state that I have already written to you on this subject in my letter No.7013-35 dated 28th January 1933.

4 In this second letter Mr. Rama Rao also states that Dr. Boswell, Professor of Geology in the Imperial College of Science, London, has informed him that if he registered immediately as a candidate for the Diploma of the Imperial College (abbreviated as D.I.C. London) and carried on research on a selected problem in Petrology till the end of October 1933 and submitted a thesis, this diploma would be conferred on him if the work came up to the required standard.

5 To complete this definite course of study and research in Petrology qualifying for the D.I.C., it would be necessary for him to stop in London for an extra 3½ months, of which six weeks would be before the American International Geological Congress and 2 months in London during September and October 1933 - after his return from America. This would involve an extra cost of £71/- as shown hereunder:-

(1)	Registration fee for D.I.C.	£1/-
(2)	Allowance for 3½ months viz., 15th May to 30th June 1933 and the months of September & October 1933 at £20/- per month.	£70/-

The amount of £35/- noted in my letter No.7013-35 dated 28th January 1933, is automatically included in this £71/- and need not be taken into account separately.

6 Since Mr. Rama Rao has been working at the Imperial College on modern petrology and allied subjects - which are well connected with the Geology of Mysore, it will certainly

be of benefit to him if he qualifies for the Diploma of the Imperial College (D.I.C) of London. As he has to stay on for six weeks or so longer in London for the postponement of the Geological Congress at Washington (U.S.A.), (to attend which was one of the conditions of his deputation) his application for an extension of the deputation period by another two months, i.e., September and October 1933, by which he would be able to qualify for the D.I.C., deserves favourable consideration.

7. As it would take time to get the formal sanction of Government, he informs me that he has already registered his name for the D.I.C. as advised by his Professor.

8 Though diploma is not of the same standard as a degree, it will however enable the holder to show that he has studied in the Imperial College of Science of London and has done some work which has been approved by the College authorities. Moreover as the extension of deputation asked for is only for a short period, I strongly recommend this application of Mr. B. Rama Rao for the kind approval and sanction of Government.

9 This will involve an additional expenditure of £71/-, £35/- of which I have already requested in my letter of the 28th January 1933 to be provided for in the ~~x~~ current years deputation charges of Mr. B.Rama Rao. The balance of £36/- may be kindly provided for and sanctioned in the budget of 1933-34 in addition to the amount of Rs.2,345-2-0 as shown in our letter No.7132-2 dated 23rd February 1933 forwarding the budget estimates for salaries, deputation charges etc. for 1933-34.

10 I beg to state that there is no source in the departmental

p.t.o

budget from which this additional expenditure can be met.

Early orders of Government are solicited.

I have the honour to be,

Sir,

Your most obedient servant,

Offg: D i r e c t o r,

Mysore Geological Department.

Bs.25/ii

Copy of letter dated, London, 9th February 1933 from Mr B. Rama Rao, Asst. Geologist (on deputation) to the Offg: Director of Geology, Bangalore.

The third circular received recently from the Secretary to the XVI International Geological Congress indicates that as at present arranged the sessions of the Congress would be held at Washington from 22nd July to 29th July 1933; and to participate in the selected tour prior to the Congress I have to reach that place on or before the 9th July. This will necessitate my stopping in London till the end of June, that is, about six weeks more than the period noted in the Government order sanctioning my deputation.

In view of this compulsory slight extension of my stay in London, I had a talk with Dr. Boswell, the professor of Geology in the Imperial College, regarding the possibility of my working for the Diploma of the College.(D.I.C). He corresponded in the matter with the Governming Body and the Board of studies concerned, and tells me that if I register immediately as a candidate for the D.I.C. and carry on research on a selected problem in Petrology, till the end of October and submit the thesis, the Diploma would be conferred, if the work comes up to the Standard required. This will need the following revision in the programme of study as has been sanctioned.

1) Leaving London for America about the 25th of June 1933.
2) July and August. Attending the Congress sessions and(summer vacation of the college) Tours etc. as has been sanctioned.
3) September and October. Resumption of research work at the Imperial college.

1st week of November - to leave for India.

To complete the definite course of study and research in Petrology to qualify for the D.I.C. as noted above it would require only an extra 3½ months of my stopping at London, of which six weeks are before the Congress and 2 months after my return from the Congress.

This would involve an extra cost as follows:-

1) Registration fee for the D.I.C. 1 £.

2) Allowance for 3½ months, viz., 15th May to 30th June, September and October at £20/- p.m. } £70

I would be very much obliged if you kindly represent this matter to the favourable consideration of Government and get their sanction for this modified programme, and for the continuance of the allowance for the extra 3½ months.

Yours faithfully,

Director,
Mysore Geological Department.

Copy of letter dated 2nd February 1933 from Mr.B.Rama Rao, Assistant Geologist (On deputation) to the Director of Geology.

In obedience to the instructions contained in G.O.No.D. 1538/9/Genl.16-32-6 dated 10th October 1932, sanctioning my deputation to England and America, I beg to send you herewith my quarterly progress report for favour of kind submission to Government.

Leaving Bangalore on the 26th October 1932, I reached London on the 13th November, and commenced regular work from the 20th of that month, in the Geology section of the Imperial College of Science, in Modern petrographic methods. The work done till now has been as follows:-

1) Determination of the Refractive indices of minerals.
2) Determination or estimation of the percentage composition of minerals in rock sections, with the aid of Shands refractometer.
3) Determination of the anorthite contents of selected plagioclase felspar with the aid of Federov's Universal stage.
4) Determination of optic-axial angles in Cordierites with the Federov's stage.
5) A comparative study of the microsections of specimens of the cordierite - Sillimanite rocks of British Isles with those of the Mysore rocks.

At present I am engaged in studying the variations in the optical properties of cordierites in general, in relation to their chemical composition. This work is expected to take some more time.

In addition I have been attending regularly the course of Lectures on advanced petrology. During the last term, i.e. from the 20th November 1932 to the 22nd December I attended the course of lectures given on some of the Geophysical methods of prospecting.

During the last week of December and the first week of January, I took the opportunity of the X-mas vacation

and had gone to Cornwall to see the China clay deposits near St. Austell and to study the method of mining, ~~dix~~ viation and the preparation of the mineral to the market. Incidentally I had also an occasion to study the mode of occurrence of the Tin and copper lodes in that neighbourhood,

Director,
Mysore Geological Department.
